

Enclose[®]

Moveable Walls

CONTRIBUTIONS TO LEED[®]

HAWORTH[®]

Enclose Contributions to LEED

Minimize impact. Maximize investment. Enclose is durable and adaptable so it will keep working for you through many years of change. Enclose products may contribute to the individual prerequisites and credits of LEED. Because LEED is a holistic building rating system and sustainable design guideline, there is no such thing as LEED certified products—only ways of using and applying products to support the criteria.

Enclose walls contributes to the following LEED Certifications:

LEED ID+C

LEED BD+C

LEED EB: O&M

LEED Core & Shell Development

Enclose® Contributions to LEED®

Product Name: Enclose System
 LEED Rating System: LEED Interior Design & Construction

Energy & Atmosphere

Credit 1.1	Optimize Energy Performance - Lighting Power <i>Enclose moveable walls designed with glazing can use daylighting to reduce designed lighting loads and energy consumption.</i>	1-3 points
------------	--	------------

Materials & Resources

Credit 2	Construction Waste Management <i>Enclose walls generate less debris than traditional dry-wall construction, Reducing the total volume of debris to be diverted. Enclose packing materials include cardboard, polyethylene film and wood, all of which are easily recycled in many markets.</i>	1-2 points
Credit 3	Materials Reuse <i>Enclose products are designed to be easily moved, refurbished if desired, and reused, contributing to this point on future projects.</i>	1 point
Credit 4	Recycled Content <i>Enclose products may contribute to this point as a typical installation contains 6% post-consumer and 6% pre-consumer recycled content.</i>	1-2 points
Credit 5	Regional Materials <i>Enclose may contribute to this point depending on the project location. Enclose is manufactured in Holland, Michigan.</i>	1-2 points
Credit 7	Certified Wood <i>Enclose products may contribute to this credit. Contact your local Haworth representative for more information.</i>	1 point

Indoor Environmental Quality

Credit 3.2	Construction IAQ Management Plan --- Before Occupancy <i>Low-emitting Enclose products reduce emissions during construction and flush-out.</i>	1 point
Credit 4.4	Low Emitting Materials- Composite Wood & Agrifiber Products <i>Enclose may contribute to this credit. Contact your local Haworth representative for more information.</i>	1 point
Credit 8.1	Daylight and Views --- Daylight <i>Variation of panel heights, selection of vision glazing, and proper orientation of components provides access to day-lighting and preservation of view corridors.</i>	1 point
Credit 8.2	Daylight and Views --- Views for Seated Spaces <i>Variation of panel heights, selection of vision glazing, and proper orientation of components provides access to day-lighting and preservation of view corridors.</i>	1 point

Innovation & Design Process

Credit 1	Innovation in Design <i>Enclose when combined with Under Floor Air Distribution (UFAD) reduces the waste from office reconfiguration by up to 97% when compared with conventional construction. This reduction can qualify for an Innovation in Design point.</i>	1 point
